

Henry M. Jackson Foundation
for the Advancement of Military Medicine

The Henry M. Jackson Foundation for the Advancement of Military Medicine is seeking a Laboratory Technician for the Deployment Health Research Center located at the Yokosuka Naval Hospital, Japan.

Responsible for research and/or development in collaboration with others for projects. Provides laboratory and technical support to senior technical and professional staff. Performs laboratory research projects, including collection and organization of data. Makes detailed observations about experiments. Assists in the preparation of technical reports, summaries, and protocols. Maintains clear and accurate laboratory records, inventories and logbooks. Performs data entry for research projects and maintains databases. Maintains supplies in the laboratory and keeps the laboratory area clean. Provides basic data analysis and interpretation. Performs other duties as assigned.

Must have knowledge of molecular techniques, basic laboratory, and safety procedures; ability to follow detailed instructions; good communication and analytical skills. Minimum Education/Training: This position requires the equivalent of a college degree in Molecular Biology, Microbiology, or Medical Technology or related field.

Minimum Experience: 0-2 years related experience. Experience in molecular methods in Bacteriology and/or Virology desired.
